

**Our collective energy:** serving your ambitions

**S E R M E S**

The mastered electric solution

A Family business  
meeting your expectations

SERMES was founded in 1949 by my father, Robert Schmittheisler. Since then, the company has retained its independence and human dimension while continually developing its collective skills.

We believe in and, make long term investments which offer not only an efficient service but answer ever changing needs.

We build as well as design electrical solutions having based our reputation in France and abroad

on our values of responsiveness, commitment, quality related service which includes our product range.

Skilled and dedicated staff, with the technical resources and “know how” that addresses the utmost professional requirements and needs demanded by customers.

**Pierre SCHMITTHEISLER,**  
Chairman of the Board of Directors

**QUALITY**

SERMES has ISO 9001 version 2008 certification for all its activities.

**COMMITMENT**

SERMES is associated with the shared Alsace brand and its values of responsiveness, respect and service quality.

**SATISFACTION**

Each year, new customers arrive and their loyalty to us remains.

What drives the people of SERMES  
is **imagining and designing**  
**tailored solutions**

DATA

CENTER

Developing our different activities by **associating technical mastery of products, advice and expert inspection** in order to implement the **specific electrical solutions** our valued clients need. Taking into account environmental and business issues, we offer smart energy management systems.

**BUILDING AND INFRASTRUCTURE**

From the worksite electrical switchboard to the final lighting of your buildings, including the entire electricity distribution system, we

**can suggest solutions that are best suited to your projects.**

Constant support by our team at every stage to ensure a “just-in-time” lead time facilitating your equipment installation.

**DRIVE SYSTEMS AND INDUSTRIAL PROCESSES**

Capable of providing a complete range of drive systems which allows you to benefit from our industrial process “know how” guaranteeing the safety and control of your production plant!

Our design department **optimises the technical solutions and monitors special developments.** Our Integrated workshop can modify both motors and geared motors with continual quality control.

Our technical and  
logistical resources  
scaled to your needs

With 50,000 m<sup>2</sup> storage capacity, we keep a large range of sub-assemblies and finished products available at all times.

Our workshops use **modern and automated equipment**, such as mobile or fixed machines for cutting cables, machining centres for electrical cabinets, secure systems for packaging, painting booths and motor test benches which means they can rapidly handle your needs for personalisation or purpose-built equipment, in accordance with your quality objectives.

Our four logistics centres have computerised resources and warehouse management solutions which ensures **stock reliability and order traceability**.

A network of approved carriers ensures compliance with delivery times.

Our disciplined yet flexible organisation demonstrates its efficiency with the 23,000 tonnes of goods and 110,000 parcels shipped every year.

In the forefront is the  
willingness of our employees  
**to be at your side at all times**

All our 270 staff will spare no effort to ensure that you benefit from **personalised support** throughout your project. From the design stage, we will help you define your needs and suggest **solutions that address your technical and cost specificities.**

Our technicians will be involved in every step of the project, to optimise on-site solutions, make

any adjustments required, carry out tests before delivery and train users in the effective operating of installations. You can count on our attentiveness and competence for the optimisation of the cost of site work.

**We guarantee that your project will be closely inspected and fully controlled before being made operational.**

Tiffany - Salesperson/Lighting

Yannick - Salesperson/Motors

Sylvain - IT

René - Workshop/Equipment and systems

Marie-Noëlle - Organisation and quality

Stéphane - Salesperson/Wires and cables

Availability, expertise,  
logistics...?

You can count on us  
**for a rapid response time**

Our teams are at your service to **rapidly address** your need for equipment or advice. Every order is **tracked closely** from preparation up to delivery.

Our centralised organisation with **50,000 m<sup>2</sup> of storage surface** and **20,000 item types in storage** ensures that 95% of our products are available at all times.

Our transport and logistic platform has been fully optimized to answer your requests, so as to deliver your orders as rapidly as possible: from 24 to 48 hours, and 72 hours for long-distance shipments in Europe.

**A commitment to compliance with delivery times!**

Packaging and shipment

Benjamin - Logistics/Wires and cables

Karine - Salesperson/Equipment and systems

Denis - Logistics/Motors

Ludovic - Purchasing and Engineering/Lighting

Michel - Travelling sales engineer

Daniel - Workshop/Equipment and systems

Our **“Know how”** means adapting our products to your needs and **specific requirements**

Each of our customers receives special attention, in order to supply products and systems that **specifically meet their needs and objectives.**

For special off-catalogue requests, we build and construct products in **the shortest possible timeframe** in our partner plants to your requirements and **our quality standards.**

Our integrated workshops are also available for making any modifications and adaptations to achieve the required technical configuration.

# Global or particular electrical solutions we are by your side

## ELECTRICAL WIRES AND CABLES

We offer a complete range of over **7000 wires and cables items** in storage. Your orders are processed **to the exact metrage required, with guaranteed fast delivery** to your store or site. We will provide

expertise for defining special cables, and get them made by our partner companies if needed.

## DRIVE SYSTEMS

We offer **immediate availability** of standard and specific products in the area of drives. Our integrated workshop can **personalise** and **optimise** our drive system on the basis of your requirements.

A computer-aided test bench system allows fully automated motor testing.

## LIGHTING

Our Lamdalux brand contains a wide range of indoor and outdoor luminaires for all areas of activity integrating the **objectives of energy economy management**. We propose **comprehensive solutions**,

**including lighting studies** with the DIALux software, and **the preparation of pre-mounted or pre-wired products**.

## EQUIPMENT AND SYSTEMS

We design and make **tailored technical solutions** for energy distribution and motor control.

Each request is tracked **comprehensively and closely**: study of needs, design and making of equipment, operating tests, and support for assembly and implementation.

Our design facility and our cabinet wiring workshop have ATEX certification, and can produce specific equipment that is “tailor made and purpose built” for hazardous or high risk zones.

## ADVANTAGES OF SERMES

- 270 staff
- 5 000 m<sup>2</sup> of offices
- 50 000 m<sup>2</sup> of storage
- over 20,000 item types stored
- 85% of partner plants located in Europe
- 4 integrated workshops
- 4 high-quality makes: LAMDALUX, ALMO, LAMDEX, ELECTRIC SYSTEMS and one service brand with ISO 9001 certification
- service and availability rates above 95%
